1. Follow the link:

TED-Ed. (2016, March 15th). *5 tips to improve your critical thinking* - Samantha Agoos. Retrieved from:

<http://ed.ted.com/lessons/5-tips-to-improve-your-critical-thinking-samantha-agoos>

2. Watch the video, taking notes. Use English subtitles if necessary.
3. Click the link on the right entitled, "Discuss." Make notes of your answer.
4. Click the link on the right entitled, "Dig Deeper." Keep notes of your discoveries.
5. Click the link in the on the right labelled, "Think". Complete the questions 1-8.
6. Present your answers to the teacher for feedback.

Notes of "Discuss" section

Critical thinking helps us evaluate information, question sources, and consider long-term consequences. By analyzing problems and exploring solutions, we can balance environmental protection with human needs. Simple actions like reducing waste or supporting green initiatives contribute to sustainability.

For "Influencing Public Policy and Society" our choices shape demand, influence businesses, and push for policy changes. Supporting eco-friendly products, spreading awareness, and advocating for regulations encourage systemic improvements. Thinking critically helps us see how individual actions drive broader change.

Notes of "Dig Deeper" section

History of Critical Thinking:

Critical thinking started with Socrates, who questioned people's beliefs to expose weak arguments. His method focused on evidence, logic, and clarity, shaping how we analyze information today. Over time, it has developed into a structured way of evaluating ideas and making better decisions.

Eight Dimensions of Critical Thinking:

Critical thinking means asking the right questions, checking facts, understanding assumptions, and considering different perspectives. It helps break down ideas logically, recognize biases, and make well-informed decisions.

Answer questions 1-8

What is one advantage of critical thinking?

- ☐ A It's a process that helps us make only large, important decisions
- ☐ B It's a process that helps us make only small, unimportant decisions
- ☐ C It's a process that helps us create hidden issues, bias and manipulation
- ☒ D It's a process that helps us reveal hidden issues, bias and manipulation

What is the first step (of five) in the critical thinking process?

- ☐ A Gather information
 - ☐ B Apply information
 - ☒ C Formulate questions
 - ☐ D Consider implications
-

1 2 3 4 5 6 7 8

When making a decision, what is the main purpose of gathering facts and information?

- ☐ A To make sure your assumptions are illogical
- ☒ B To weigh out various options or choices
- ☐ C To ignore the implications of your choices
- ☐ D To explore your own perspective and point of view

1 2 3 4 5 6 7 8

Considering the implications of a decision means:

- ☒ A Examining its potential outcomes and effects
- ☐ B Asking questions to determine your goal
- ☐ C Gathering information to weigh out options
- ☐ D Determining whether information is logical

1 2 3 4 5 6 7 8

How can critical thinking improve your chances of making better choices?

- ☐ A Critical thinking helps you pick the correct and best choice for all situations
- ☐ B Critical thinking helps you explore only your own perspective and no others
- ☐ C Critical thinking helps you examine information and make unreasonable choices
- ☒ D Critical thinking provides you the tools to sift through complex information logically

Consider the example of the diet craze presented in the video. In your own words, explain how you would apply information to determine whether the weight-loss claims are logical and accurate. Be specific about each step you would take.

To evaluate weight-loss claims, I'd check if the source is credible and backed by research. I'd look for scientific evidence, question unrealistic promises, and consider other factors like calorie reduction. Assessing risks and expert opinions would help determine if the diet is effective or just a fad.

Read the scenario below and respond to the prompt that follows. Two candidates are running for President of the United States. One candidate advocates for reducing corporate taxes to incentivize businesses to open in the US, fostering the economy. The opposing candidate wishes to increase corporate tax rates to use the revenue to address domestic issues like education. Describe why it is valuable and beneficial to the decision-making process to explore both political perspectives prior to casting your vote.

Exploring both perspectives before voting helps ensure an informed decision. Understanding the benefits and drawbacks of each policy allows voters to consider economic impact, social outcomes, and long-term effects. It also helps avoid bias, promotes critical thinking, and leads to a choice that aligns with personal values and national interests.

Silently reflect on an upcoming choice you may encounter in the future. Compose a paragraph (5 sentences maximum) that discusses how you will employ the critical thinking to enhance your decision-making process. Be specific about how you would apply at least three of the five steps mentioned in the video.

For an upcoming decision, I will evaluate the credibility of my sources to ensure I have accurate information. I will analyze the possible outcomes by weighing the pros and cons of each option. Considering alternative perspectives will help me avoid bias and see the bigger picture. I will also assess long-term consequences to make a sustainable choice. By applying these steps, I can make a well-
